I have not talked to anyone from the media concerning West... don't want my hand slapped....

But if David or Diane want me to talk to someone about EPCRA, I will be happy to...

Is this a still dangling request or have your folks chatted with the guy?

Hello Carl –

I was informed that any outside calls regarding the West Fertilizer Plant should go through you folks. I am pretty sure I have received one of those calls, though the plant was not specifically mentioned.

While I was out of the office yesterday, I received a phone call from Daniel Lathrop with the DMN. His number is 214-977-8424. He was specifically mentioning the Tier II aspects of EPCRA, which are handled by Steve Mason and Misty Ward.

Regarding EPCRA 313: The West Fertilizer Plant has not reported to the Toxic Release Inventory in the past. It is possible that they may not meet the criteria for EPCRA 313 reporting. We are planning to conduct an inspection and/or record review.

If this should be bounced back to us, then please do so.

David Riley
